1. To study or examine carefully.
2. Closely and firmly packed together.
3. Like a cycle; when events continue to happen in the same order.
4. Factual or measurement information.
5. A response, often one that sets a process in motion. The response can then also be affected by the process it set in motion.
6. To make a small change in.
7. A natural happening that causes much damage or suffering.
8. Easy to tell what one thinks will happen in the future.
9. Groups of organisms that resemble one another in appearance, behavior, chemical processes, and genetic structure.
