## Natural Inquirer Scientific Process Module

## Unit 1, Lesson 3 The BIG Idea Graphic Organizer

## Name:

Thinking About	Thinking About the	Question Studied (Hint:	How is the question related to Thinking
Science Concept	Environment Concept	Look at the "Introduction")	About Science and Thinking About the Environment?
Using numbers to understand problems	The Carbon Cycle	Which tree species grow the longest before CO2 emissions from machines are greater than the tree can absorb?	Using numbers enables scientists to answer their question about the carbon cycle. Knowing about the carbon cycle helps the scientists understand how to frame their question.
	About Science Concept Using numbers to understand	About the Science Environment Concept  Using numbers to understand  About the Environment Concept  The Carbon Cycle	About Science Environment Concept Concept Concept Studied (Hint: Look at the "Introduction")  Using numbers to understand problems  The Carbon Cycle Species grow the longest before CO2 emissions from machines are greater than the
